

VERITAS NETBACKUP™ 5240 APPLIANCE

A SINGLE-VENDOR, ENTERPRISE BACKUP
APPLIANCE THAT IS READY TO BACKUP
IN MINUTES

VERITAS™

OVERVIEW

The Veritas NetBackup™ 5240 Appliance is a fully integrated Enterprise backup appliance with expandable storage and intelligent end-to-end deduplication for physical, virtual and cloud environments. Only Veritas appliances deduplicate on both the client and target side.

Veritas NetBackup™ 5240 Appliance delivers greater capacity, density and performance to reduce customers' operating and capital expenditures. As a purpose-built backup appliance (PBBA), it enables the ability to address customers' data center challenges while simplifying data protection needs.

PRODUCT HIGHLIGHTS

- **Suitable for any environment**—Starting at 4 TB and expandable up to 201 TB usable capacity, NetBackup 5240 is ideal for both remote offices and enterprise data centers.
- **Multiple functional roles**—Deploy as master server, media server, or both for a NetBackup domain.
- **NetBackup environments**—Easily expand or refresh existing NetBackup environments without disrupting operations.
- **Ultimate virtual machine protection**—Supports VMware® vSphere™ and Microsoft Hyper-V®, no proxy servers required.
- **Wide Area Network (WAN) optimization**—Up to 10x faster transfer rate for backups to cloud and replicating off-site.
- **NetBackup Accelerator**—Delivers traditional, full backups at the speed of incremental backups.
- **Simple and fast snapshot replication**—Accelerate snapshot replication management and granular file level recovery from any replicated snapshot image.
- **Operational simplicity**—Power up and walk through the installation wizard to start backing up in minutes.
- **Improve resource utilization**—Decrease backup storage up to 50 times and bandwidth consumption up to 99 percent.
- **Flexible deduplication options**—Deduplication at source or target; inline or post-process.
- **Dynamic storage**—Usable capacity can be any combination of up to 201 TB deduplication pool or Advanced Disk pool (non-deduplicated storage).
- **Eliminate Build-Your-Own Media Servers**—Reduce the operating cost, complexity, and frustrations of building and supporting your own media servers
- **Simple NetBackup software licensing**—Pay once for NetBackup software and freely replicate, change retention policies, and refresh hardware without penalties.
- **Auto Image Replication (AIR)**—Replicate backup images to a remote NetBackup domain for electronic vaulting and disaster recovery readiness.
- **Symantec™ Data Center Security**—Protects against zero-day attacks and malicious insider threats.
- **Heterogeneous cloud gateway**—Serves as a gateway unit for sending backups to supported cloud storage vendors.
- **Resilient hardware architecture**—Multiple data paths deliver greater data protection and system availability, along with redundant hot swap components, featuring redundant power supplies, fan modules, and hot pluggable data disks.
- **Veritas AutoSupport**—The hardware monitoring feature ensures your backup environment is working at top efficiency, allowing you to anticipate needs before they become issues.
- **Veritas NetBackup™ Copilot for Oracle®**— A revolutionary new way to enable collaborative database backup and recovery.
